SUMMARY

BCA student and entry-level Software Developer with strong fundamentals in C++, Java, and Data Structures & Algorithms. Experienced in building console-based applications and responsive websites using HTML, CSS, JavaScript, and Bootstrap. Strong in problem-solving and eager to learn and contribute in a structured IT environment.

SKILLS

Programming Languages: C, C++, Java, Python, JavaScript.
Web Technologies: HTML5, CSS3, Bootstrap.
Core Concepts: Data Structures & Algorithms, OOP, Problem Solving.
Database: SQL, PL/SQL.
Tools: Git, GitHub, VS Code.

PROJECTS

PersonalPortfolio Website

- Tech Stack: HTML, CSS, JavaScript.
- Designed and developed a responsive personal portfolio website with clean UI.
- Implemented interactive features using JavaScript to improve user experience.
- Ensured responsive layouts across devices using CSS.
- Live Demo: <https://amanshah-here.github.io/Portfolio/>

Student Management System | C++

- Built a console-based student record management system using file handling for persistent data storage.
- Added sorting and searching features based on roll number and name.
- Implemented CRUD operations with input validation and error handling.

Mini Search Engine | C++

- Developed a mini text-based search engine in C++ using hash maps and inverted indexing to efficiently search across multiple documents.
- Implemented string preprocessing and frequency-based ranking to improve search accuracy and performance.
- Applied data structures and algorithmic concepts to optimize search operations.

EDUCATION

Bachelor of Computer Applications
L.N.MishraCollegeofBusinessManagement | Percentage: 75%
08/2023 - Present

Class XII
BSEB | Percentage: 74%

Class X
CBSE

CERTIFICATIONS & ACTIVITIES

Generative AI for Education & Development - NPTEL	Data Structure & Algorithms using C++	College Hackathon 2025 Team Participant
